25X1

Dear

25X1

Enclosed are the samples of balloon material that we discussed over the phone. We would like the following information:

1. Thickness of material on both sides of seam for each sample.
2. Melt index of material for each sample
3. Cold brittleness temperature of each sample on both sides of the seam.
4. Toughness of material on both sides of seam for each sample.
5. Transverse and machine direction tensile strength of material on both sides of seam for each sample.
6. Tensile strength of seal for each sample.

I will pick up the information when it is available.

Sincerely,

25X1
